Code 11640 (Excision malignant lesion, face, ears, eyelids, nose, lips; lesion diameter 0.5 cm. or less)

Modifiers -GN, -GO, and -GP must be used to identify the therapist performing speech language therapy, occupational therapy, and physical therapy respectively.

Modifier -50 (bilateral) applies to diagnostic, radiological, and surgical procedures.

Modifier -52 applies to radiological procedures.

Modifiers -73, and -74 apply only to certain diagnostic and surgical procedures that require anesthesia.

Following are some general guidelines for using modifiers. They are in the form of questions to be considered. If the answer to any of the following questions is yes, it is appropriate to use the applicable modifier.

1. Will the modifier add more information regarding the anatomic site of the procedure?

EXAMPLE: Cataract surgery on the right or left eye.

2. Will the modifier help to eliminate the appearance of duplicate billing?

EXAMPLES: Use modifier 77 to report the same procedure performed more than once on the same date of service but at different encounters.

Use modifier 25 to report significant, separately identifiable evaluation and management service by the same physician on the same day of the procedure or other service.

Use modifier 58 to report staged or related procedure or service by the same physician during the postoperative period.

Use modifier 78 to report a return to the operating room for a related procedure during the postoperative period.

Use modifier 79 to report an unrelated procedure or service by the same physician during the postoperative period.

3. Would a modifier help to eliminate the appearance of unbundling?

EXAMPLE: CPT codes 90765 (Intravenous infusion, for therapy, prophylaxis, or diagnosis (specify substance or drug); initial, up to 1 hour) and 36000 (Introduction of needle or intra catheter, vein): If procedure 36000 was performed for a reason other than as part of the IV infusion, modifier -59 would be appropriate.
